Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This is a normal variation to a tier 3 bespoke environmental permit for a waste transfer station with treatment.

This variation is to:

- update the permit to modern conditions;
- consolidate the original permit, the previous variation (EPR/BP3797SZ/V002) and this variation;
- increase the permitted area;
- increase the annual throughput to 125,000 tonnes; and
- add new treatment operations.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
