Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This permit variation permits the point source discharge of surface water effluent from the civic amenity site and transfer station to sewer via the existing landfill leachate pumping system under the consent of Dwr Cymru. The permit consolidation will modernise the permit which incorporates the original bespoke permit for the civic amenity site and a standard rules 2008No1_25kte for the transfer station.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
