Dear Sir/Madam,

**MODIFICATION OF WASTE MANAGEMENT LICENCE NO: L1/4**

I refer to earlier correspondence detailing Environment Agency Wales' proposals to modify your waste management licence with regard to site waste input/output returns. I hereby enclose a notice to modify your licence conditions in accordance with Section 37 of the Environmental Protection Act 1990. The modification takes effect from the date on the notice. You are advised to read this letter and enclosures carefully as it contains information important to your business.

**The modification**

The enclosed licence modification requires you to keep a record for each load of waste or material accepted or removed from the site. The records shall give details of quantities, types and origins/destinations of waste accepted, disposed of and /or recovered at, and taken away from, the site. I enclose a daily record sheet which you may use if you wish. A summary report must be made for each quarter of the financial year and must be submitted to the Agency on the enclosed return form within one month following the end of the quarter. The first return in the new format covering the three month period from 1<sup>st</sup> April 1999 – 30<sup>th</sup> June 1999 should be made by 31<sup>st</sup> July 1999. Metal Recycling Sites are required to make at least an annual return with the first return in the new format covering the period 1<sup>st</sup> April 1999 – 31<sup>st</sup> March 2000 to be made by 30th April 2000.

The Agency requires quantities of wastes to be identified in tonnes. Where you are not able to determine weights then the Agency will require you to measure volumes and convert them into tonnes using conversion factors which are enclosed with this letter.

The Agency recognises that the requirement to identify the origin of wastes by local authority area (Unitary Authority in Wales and District Council in England) for each vehicle load may present difficulties where a vehicle load consists of small amounts of waste collected across several local authority areas. Where this is the case the Agency will not require a record to be kept of district of origin for each part of the load. However, the summary record sent in to the Agency should identify district of origin for wastes types and quantities; this should be worked out from Duty of Care transfer notes or from invoicing details.
