Dear Sir or Madam,

Sundorne Products Limited currently hold an Environmental Permit with reference EPR/PB3490HV, to operate a household, commercial and industrial Waste Transfer Station with treatment.

We are applying on behalf of the client to vary their existing Environmental Permit for the following items: -

- Add the following Environmental Waste Codes to be accepted at the facility:
 - 15 01 02 – plastic packaging;
 - 15 01 04 – metallic packaging;
 - 15 01 06 – mixed packaging;
 - 15 01 07 – glass packaging;
 - 19 12 12 – other wastes (including mixtures of materials) from mechanical treatment of wastes other than those mentioned in 191211;
 - 20 01 01 – paper and cardboard;
 - 20 01 02 – glass;
 - 20 01 08 – biodegradable kitchen and canteen waste;
 - 20 01 11 – textiles;
 - 20 01 39 – plastics;
 - 20 03 03 – street cleaning residues;
 - 20 03 07 – bulky waste.
- Additional storage area, as seen on Drawing 240-02-05.D01.

Following the 'Environmental Permitting Charging Scheme and Guidance' set out by NRW; it is understood that this application is a minor technical variation and therefore the required fixed fee of £1,280 has been outlined in the relevant section on the Part F1 form.

The following documentation is included with this submission for the variation application: -

- Application forms Part A, Part C2, Part C4 and Part F1;
- A copy of the Environmental Management System for the site, including a Site Specific Risk Assessment;
- Drawing 240-02-05.D01;
- WAMITAB Certificate for the Operator;
- Odour Management Plan for the facility.

The submitted Odour Management Plan is undergoing changes following advice from Ms Liane Bacon of NRW; to include a contingency plan in the event the boat is delayed and the baled waste cannot remain on site longer than the 6 week period. Once this has been incorporated, an updated copy will be sent to NRW.

We trust that this meets the requirements for the application; however, if you have any queries, please do not hesitate to contact me.

Yours faithfully,
