

Notice requiring further information

Notice of request for more information

Environmental Permitting (England and Wales)
Regulations 2010

Mr. Daniel John
Pembrokeshire County Council
daniel.john2@pembrokeshire.gov.uk

Application number: EPR/CB3793HE/A001

Natural Resources Wales, in exercise of its powers under paragraph 4 of Part 1 of Schedule 5 of the above Regulations, requires you to provide the information detailed in the attached schedule. The information is required in order to determine your application for a permit, which was duly made on 31st July 2014. The information requested should be sent to the following address by 5th January 2015.

Information should be sent to:

Louise Bailey- louise.bailey@naturalresourceswales.gov.uk

Name	Date
Louise Bailey	16 December 2014

Authorised on behalf of Natural Resources Wales

Schedule

1. A dedicated odour management plan.

In the schedule 5 notice sent to you on 19th November 2014 we requested an odour management plan (OMP) to be produced in line with horizontal guidance note [H4 Odour](#). The OMP that was supplied on 10/12/14 does not meet this guidance. Appendix 4 of the horizontal guidance note H4 Odour clearly sets out the information that needs to be included in the odour management plan.

Please supply an odour management plan which meets the standards set out in H4, *and* which is appropriate to the level of potential risk from your *particular* waste types/treatments.

2. EWC waste code

In your email of 10/12/14, you have requested we remove the wording “(consisting of general ‘black bag’ waste only)” from the waste code description as you intend to treat ‘HWRC residual waste’ through this facility.

We put the additional wording in the waste description based on the information provided in the pre-application meeting prior to the application being submitted. And, because waste code 20 03 01 is usually used to reference ‘black bag’ residual waste.

Please provide further information with regards to what you mean by the term “HWRC residual waste”:

1. What specifically will the waste consist of?
2. Will any treatment of this waste have been carried out at the HWRC prior to being brought to your site?

We need this information to be able to assess whether 20 03 01 is the correct EWC code for this waste, and if the pollution prevention measures put forward in this application are suitable. This information will also need to be provided in the OMP section on source materials – with regard to accurately profiling your incoming waste streams in order to quantify risks/measures etc.
