

Application to vary a marine licence

Variation request details

Marine licence number

ORML1957v1

Expiry date of current licence

* 15/12/2035

Licence holder name

Marine Energy Wales

Variation type

Complex change

Brief description of licence variation that is required.

(Identify licence condition numbers and reference the supporting documents within your current licence which are likely to be affected)

This application seeks to vary Condition: 3.26 - The Licence Holder must ensure that all works at each site are in accordance within the project envelope parameters detailed in Appendix 1. This application provides additional information to update the assessment undertaken in the original META Environmental Statement.

Following discussions with marine developers it has become apparent that some of the parameters within the Project Design Envelope (PDE), approved under ORML1957v1, do not allow sufficient flexibility to test components progressing through design stages. Therefore Marine Energy Wales are proposing to vary a limited number of values within the PDE and will be seeking a variation to ORML1957v1. A total of 5 variations to the marine license include:

- An increase in the speed of moving parts from ≤ 5 m/s to ≤ 10.5 m/s at Warrior Way;
- An increase in the number of rotors on a single device at Warrior Way from 1 rotor to 3 rotors. The currently consented maximum diameter per rotor (<5 m) will remain the same however the total swept area will increase from 19.63 m² (for one rotor) to 58.89 m² (for three rotors);
- An increase in the height of structures above the water surface from <2 m to <5 m, within a discrete footprint of 10 m x 10 m at Warrior Way and Dale Roads;
- An increase in the area of the mooring spread from 150 m² to 22,500 m² at Warrior Way; and
- An increase in the area of the mooring spread from 200 m² to 40,000 m² at Dale Roads.
