A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

NRW Environment Officer Richard PALMER in attendance of MTCBC, Units 3/4, Merthyr Tydfil to complete a compliance inspection of the environmental permit EPR-EB3393HT.

Given the non-operational status of the facility, the visit was made to discuss the surrender of the environmental permit with the operator and complete a final inspection of the permitted area.

The weather was mild and clear at the time of the inspection.

Inspection

There were no waste materials or machinery present within the permitted area at the time of the inspection (see photo 1). Site activities had clearly ceased.

The impermeable surface present within the site building and on the main yard area was in good condition.

No ongoing pollution risk to ground or water was identifiable at time of the inspection.

No compliance breaches were identified during the inspection.
