1st December 2016

Dear Michelle

As discussed last night, we are returning your permit application for Coed Darcy Urban Village. This is because the quantities of waste proposed to be treated mean that the activities would be carried out as an installation activity rather than a waste operation. In order to operate as an installation we require a detailed assessment to demonstrate how the activities would be carried out in accordance with Best Available Techniques (BAT).

Should you wish to re-apply for an installation permit we require the correct application forms, fee and supporting documentation. We would strongly recommend seeking pre-application advice prior to re-submitting a permit application, this should be arranged via the local compliance officer you have been dealing with.

The fee paid will be refunded to you separately.

Yours Sincerely,

Kevin Ashcroft
Senior Permitting Officer (Regulated Industries)
