Notes for livestock numbers

- (a) The total N produced per livestock unit refers to a 7 and 1/2 month period for bull beef.
- (b) The total N produced per livestock unit refers to a 6 month period for young cattle, calves, big and small lambs.
- (c) For laying hens, broiler breeders and pullets a livestock unit is the number of poultry housed in the year divided by 1000. For example if you have 200,000 hens enter this as 200.
- (d) For broilers, male and female turkeys and ducks a livestock unit is the number of poultry per crop (i.e. number in flock at any time) divided by 1000. Thus if 60,000 broilers are produced from 6 crop in the year enter 10 livestock units.
