Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This is an Environment Agency Led Variation. The discharge to soakaway was approved but not consented when the permit was issued. However under EPR2010 Regulations, the discharge needs to be consented. Due to the site being situated above a major aquifer, granting an environmental permit would not be possible in these circumstances. Therefore appropriate site drainage is requested.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
