Introductory note

This introductory note does not form a part of the notice.

The following notice gives notice of the variation and consolidation of an environmental permit.

This variation allows the increase of waste throughput to allow the landfill to be filled quicker, it does not authorise more waste in total to be accepted. A consolidated permit in modern format has been produced which adds additional conditions in relation to pests, fire management and implementing the waste hierarchy. Emission limits have been revised to reflect better understanding of the site.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Schedule 1

All conditions have been varied by the consolidated permit because of the application made by the operator. The consolidated permit contains new conditions found in NRW's generic permit template. Emission limits have been updated in Schedule 3 of the consolidated permit to reflect more recent monitoring results.

Schedule 2 – consolidated permit

Consolidated permit issued as a separate document.
