Dear Sirs

I write in ref to our Asbestos Permit Transfer from 3 sixty Waste Management to Windsor waste management at Chapel Farm Industrial estate Newport NP11 7BH.

I enclose all the signed documentation requested and as advised by your permitting department. The Opra section I have been advised not to fill in as this is a set standard rules fee of £1999.00 which we are also being advised by Stephen Badman to BACS payment to yourselves once the documentation has been submitted and a ref number issued to pay against.

I understand that my director has been liaising with Caroline Drayton in speeding this transfer through due to the nature of the unsupervised and permitted waste already on site.

We would like to take control of this site very quickly and bring it back to the standard and ensure it is kept compliant and managed in a controlled environment.

Kind Regards

Wayne Londors
