Private & Confidential

Profile: I am currently pursuing a career as an Asbestos coordinator/ Surveyor / Manager. During my 15 year career within the Hazardous Waste industry I have gained a vast knowledge and continue to learn on a daily basis. Asbestos Hazardous waste is one of the most heavily regulated industries.

I am a well-organized individual who is more than familiar working within a pressurized management environment. I can communicate comfortably at all levels and strive to forge and maintain excellent customer/client relations. I welcome the opportunity to gain new experiences and relish meeting new people.

My goal is to complete my work thoroughly and to a high standard. I am reliable, eager and work very effectively. I am committed and fully prepared to work hard in order to accomplish my career objective.

I have ensured the smooth and efficient running of many projects, be it Asbestos Removal, Disposal of Hazardous Waste, & Surveys both in and around Wales, and throughout England.

As a highlight / caption of my career I have surveyed over 2600 buildings; produced written reports & asbestos registers. I have inspected small properties, large scale power stations and many various sized buildings.

My career within the hazardous industry has provided me an In-depth knowledge of inspecting & managing Asbestos Materials and their presence in buildings, locating and producing management plans and reports.

I have completed many Four Stage Clearance certifications to UKAS standards for asbestos removal projects; involving the examination of all on-site documentation, management of on-site personnel including complete assessments of site conditions.

Once asbestos removal has been completed, I have carried out visual inspections with a keen eye to examine for the presence of remaining asbestos materials.

Many of the projects I manage involve asbestos testing and inspection, carried “out of hours” and weekends, this minimizes risk and project exposure to the public / third parties.

A list of just a few projects currently under my supervision:

Project #1 Role: Project Management/surveying task From Feb 2014 – current Site: Approx. 160 to date. Valleys to coast, local authority owned properties This role currently involves surveying/inspection /producing asbestos registers for individual tenanted properties in and around the Bridgend area of South Wales. All asbestos registers are bespoke and individually typed by myself.

Project #2 Role: Project Management Task From 2010 – current Site: Dow Corning Ltd, Cardiff Road, Barry, CF63 2YL This large Silicon Plant project consisted of a full asbestos survey; involving a full resurvey of site and providing assistance with design and implementation of a bespoke database for our client; Dow Corning Ltd Upon completion and handover of the database, I project manage scheduled annual inspections and maintenance, along with all asbestos removal on site projects. I am first point of contact for all asbestos testing & inspection, and attend on a regular basis, updating the bespoke asbestos register/database.

Project #3 Role: Project Management Task From 2012 – current Site: Momentive Chemicals Ltd, Sully Moors Road, Barry, CF64 5ZE A chemical plant involving quarterly inspections to all ACMs to ensure an accurate register is kept for our client; they remain fully compliant with current legislation. Written reports issued to our client and asbestos register updated on a quarterly basis with recommendations. All asbestos removal projects are managed and audited by myself.

Project #4 Role: Project Management Task From 2010 - 2012 Site: CCBC, Tir y Birth Depot, New Road, Hengoed, Approximately 140 properties owned by the CCBC, successfully surveyed, with the asbestos register issued to the client within 7 days for each property. Asbestos removal carried out to these properties was project managed by myself, and subsequently passed onto our assisted sub contracted UKAS accredited company.

INTERESTS & HOBBIES

I love to travel through the solitary and silent countryside to unwind from a week's work, and at times, weather permitting, Stacey, my partner of 12 years, and our children accompany me.

In 2012 I successfully reached the summit of Snowdonia, Wales, and raising funds for cancer research. In 2013 I successfully completed the Welsh 3 peaks raising funds for cancer research.

I regularly enjoy Walking & Hiking in the beautiful country we live in.

- Camping
- WRC
- Formula 1 Racing
- Mountain biking
- Caravanning

End.
