**BP06**

**Non-Technical Summary**

This tier 3 waste operation permit application is being made to enable Boomeco Limited to continue exporting various specifications of graded, shredded and screened recovered wood to meet export contracts.

The wharf in question is located on the north east side of the eastern dock at Bird Port, Corporation Road, Newport, Gwent, NP19 4RE. The perimeter of the proposed area is marked with a green outline in the following supporting document 'BP01 Bird Port Site Plan'.

Boomeco has carried out the same operation at other sites for several years. The operation comprises of using the wharf for temporary storage of the woodchip product prior to loading vessels for export. Woodchip deliveries are made by LGV's with walking floor trailers that are tipped on the proposed area marked on the Site Plan (BP01 Bird Port Site Plan).

The operating techniques planned for the site are the following:

**Facility type code: A11 - Household, commercial and industrial waste transfer station**

| Description of waste operation | Relevant technical guidance | Document reference |
|---|---|---|
| LGV trailers tipping | WAMITAB & Integrated Management System Manual | BP02 /BP03 |
| Stockpiling delivered products | WAMITAB & Integrated Management System Manual | BP02 /BP03 |
| Loading vessels | WAMITAB & Integrated Management System Manual | BP02 /BP03 |

The proposed wharf is an uncovered level concrete surfaced quayside. More details on the site condition is specified in the following supporting document 'BP04 H5 Site Condition Report'.

All operations and pollution protection issues are controlled by Boomeco Limited's Integrated Management System (BP03 Integrated Management System Manual). Boomeco Limited's Managing Director is WAMITAB certified (BP02 WAMITAB Letter and Certificate) and the company's Production Manager, Production Supervisor and Business Support Officer is in the process of achieving the same qualification.
