### Introductory note

#### **This introductory note does not form a part of the permit**

The main features of the permit are as follows.

This is a tier three bespoke permit for a household waste recycling (civic amenity) site, household, commercial and industrial waste transfer station with treatment facility and a mixed end-of-life (ELV) storage and depollution facility and metal recycling site (MRS).

Treatment operations are limited to bulking up, sorting, separation, compaction, baling, shredding of wood and green waste, dewatering of road sweepings and gully waste, screening, crushing, depollution of waste motor vehicles, grading, shearing, cutting and dismantling and repair or refurbishment of Waste Electrical and Electronic Equipment (WEEE) waste.

All hazardous and non-hazardous waste shall be stored and treated on an impermeable surface with sealed drainage to foul sewer. All inert waste shall be stored and treated on hardstanding or an impermeable surface with sealed drainage to foul sewer.

The maximum quantity for waste to be accepted at the site shall not exceed 315,050 tonnes per year.

This permit does not allow the burning of any wastes, either in the open, inside buildings or in any form of incinerator.

This permit does not allow any point source emission into surface waters or groundwater. However, under the emissions of substances not controlled by emission limits rule:

- clean, rainfall dependant drainage from areas of the site not used in connection with the storage or treatment of waste may be discharged directly to surface waters, or to groundwater by seepage through the soil via a soakaway, and
- run-off from areas impermeably surfaced areas used for the storage and processing of waste only, may be discharged to foul sewer subject to a consent issued by the local water company, via suitable, well maintained interceptors as shown in drainage plan reference 1272.04.
- Clean rainfall dependant drainage to ground from areas of hardstanding used to store specified waste types only as shown in drainage plan reference 1272.04.

The status log of the permit sets out the permitting history, including any changes to the permit reference number.
