

## **Rhayader Depot – Waste Transfer Facility**

Proposed changes to waste storage, from April 2016 - onwards:

### **Non-technical summary:**

Rhayader Depot Grid Reference: SO 967 680

### **Description of the current Permitted Activities (permit No. EPR/DB3930AB):**

#### ***A11 – Household, commercial and industrial waste transfer station***

*The permit will allow Powys County Council to bulk recycle on site, therefore avoiding the need to transport recycle long distances on a daily basis. The majority of this recycle will be non-hazardous household recycle from kerbside collection rounds, along with a small amount of non-hazardous household recycle from community recycling sites and non-hazardous commercial recycle.*

*The following recycle streams will be unloaded into skips, or bays before being bulked in skips, prior to onward transfer:*

- Mixed plastics, aluminium and ferrous cans*
- Newspapers and cardboard*
- Mixed glass*
- Food waste*

### **Proposed changes:**

In addition to the existing recycle streams listed above which will be collected and stored as existing arrangements; Powys County Council intends to bulk residual household waste in a new covered building. This will avoid the need to transport residual waste long distances in refuse wagons daily.
