

PERMIT

CONTROL OF POLLUTION ACT 1974

PART I

OUTGOING

WASTE DISPOSAL LICENCE

THE * Montgomeryshire District Council
 HEREBY GRANT a Waste Disposal Licence, pursuant to an application dated
 27 February 1993, in respect of the following:

Full name and address of licence holder	Lovatt Brothers (Partnership) Goetre Villa Abermule, Powys
Full name and address of local representative (if any) of licence holder	N/A
Location of site to which this licence relates	Goetre Villa Abermule Powys
Form of deposit or disposal to which this licence relates	Scrap Facility
Types of waste of which deposit or disposal is authorised and any limitation as to quantity	As specified by Conditions D.1 and D.2 of this Licence.

This Licence is granted subject to the following conditions:—

Listed on the attached sheets.

Dated 11 October

19 93 .

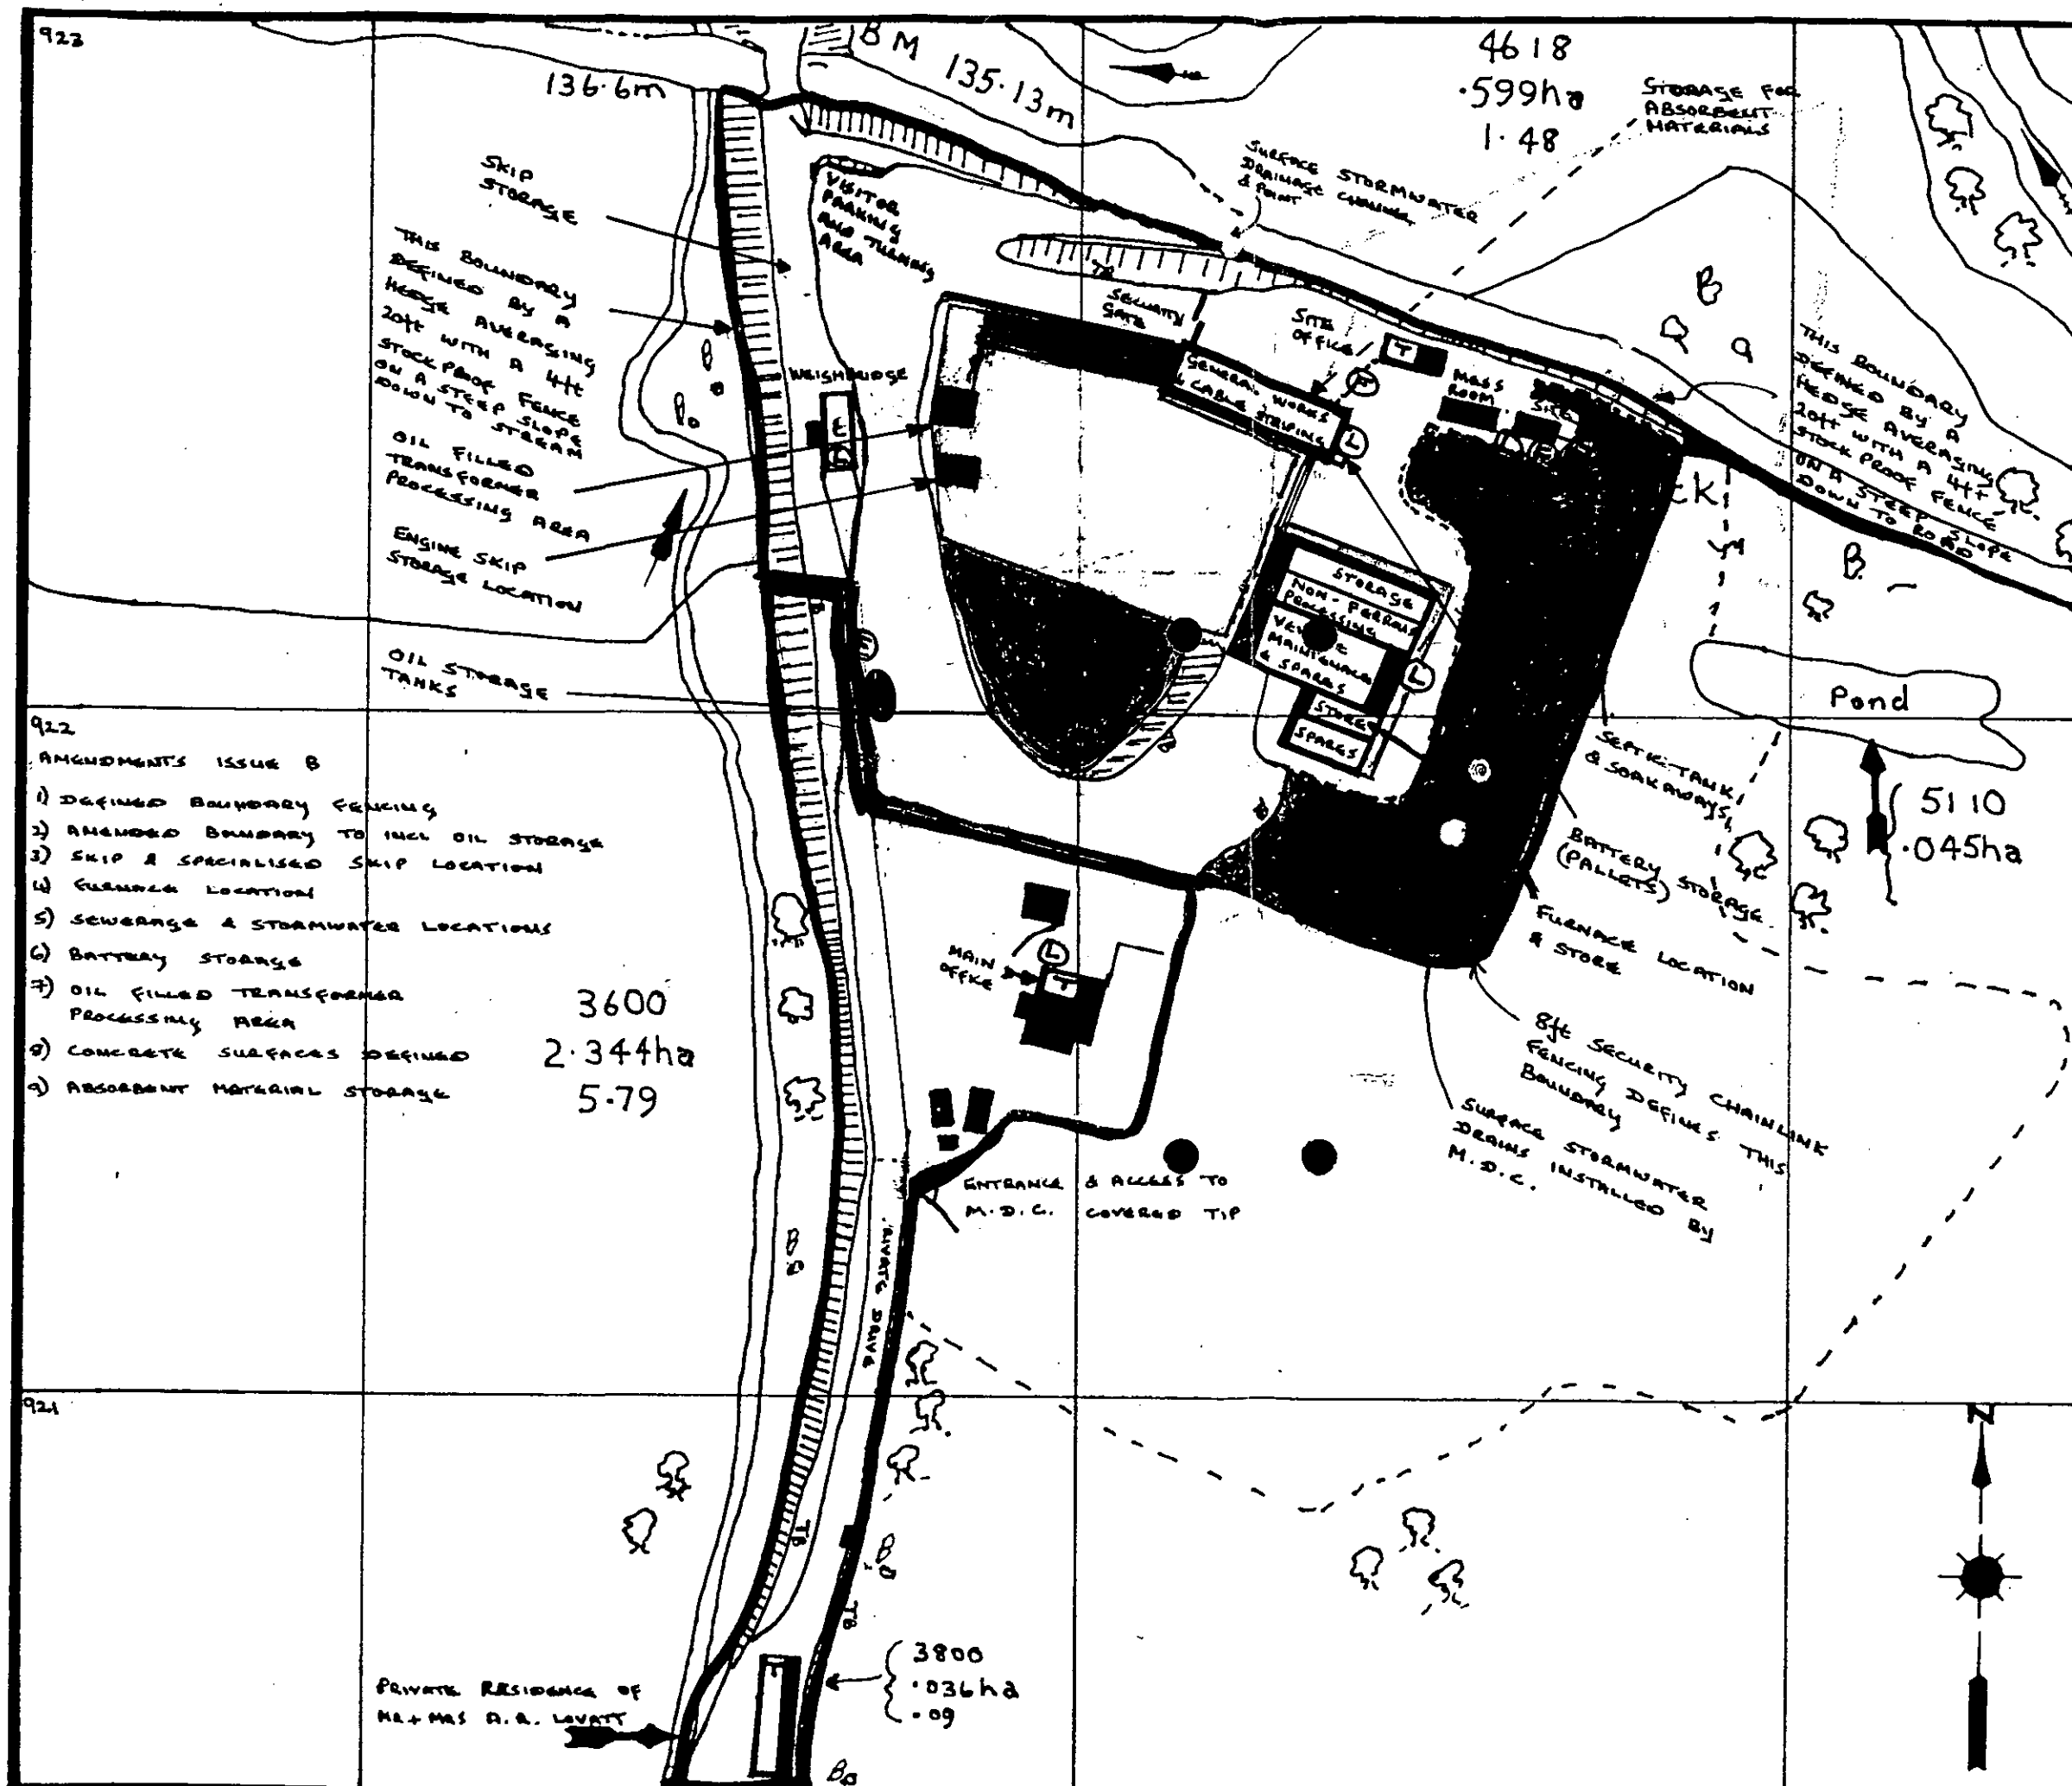

(Signed)

(Designation) Director of Technical
Services

THE LICENCE HOLDER SHOULD READ CAREFULLY THE NOTES OVERLEAF.

* Insert name of Waste Disposal Authority.

LEGEND:-

- WORKS BOUNDARIES
- LAND ADJOINING
- CONCRETE SURFACES
- VISITOR PARKING/TURNING
- GENERAL PROCESSING
- NON-FERROUS STORAGE PROCESSING AREA
- SLOPING BANKS
- TELEPHONE
- FIREPOINT
- WAITING POINT
- SEPTIC TANK & SOAKAWAYS

GENERAL:-

- 1) ALL BOUNDARIES SURROUNDED BY 4ft STOCKPROOF FENCING TOGETHER WITH ESTABLISHED TREES & SHRUBS OTHER THAN INDICATED
- 2) AREAS NOT OTHERWISE INDICATED WITHIN THE WORKS BOUNDARIES ARE HARDSTANDING DRIVE & ACCESS POINTS TO DESIGNATED WORK AREAS.

PURPOSE:-

SITE LOCATION & OPERATIONAL PLAN FOR LICENSE APPLICATION; SCRAP MATERIAL PROCESSING & STORAGE

SITE ADDRESS:-

WASTE DISPOSAL SITE LICENCE FOR SCRAPYARD FACILITY

GOETRE VILLA, ABERMULE

NOTES

These notes are for general guidance only and they do not constitute an authoritative statement of the law.

This licence relates only to the requirements of the Control of Pollution Act, 1974 Part I, and any subsequent legislation which may repeal this, for the deposit of waste or the use of plant or equipment subject to the conditions set out in this licence and does not constitute a consent required by any other legislation. In particular, it is the responsibility of the licence holder to comply with any requirements of the Health and Safety at Work etc Act, 1974, the Radioactive Substances Act, 1960, the Town and Country Planning Acts, the Scrap Metal Dealers Act, 1964, the Clean Air Act, 1993, Fire Precautions Act, 1971 and all relevant Water Protection and Environmental Health Legislation.

The sorting, recycling and recovering of waste falls within the scope of the Factories Act, 1961 and the Health and Safety at Work etc Act. The licence holder should comply with these regulations which shall be enforced by the Health and Safety Executive. The licence holder should notify the Health and Safety Executive of the sorting, recycling or recovering operations at the site as soon as is practical after the granting of this licence.

If the licence holder ceases to occupy the land specified above, then he may transfer the licence to the new occupier after giving notice to the Waste Regulation Authority that he proposes to transfer the licence on a day specified in the notice. The Authority may decline to accept the new licence holder, subject to provisions of Section 8(1) of the Control of Pollution Act, 1974. Part I and any subsequent legislation which may repeal this.

If the licence holder wishes to cancel this licence, he must return it to the Waste Regulation Authority together with a notice stating that he no longer requires the licence. Cancellation of the licence will not affect any outstanding liability of the licence holder under the conditions of the licence.

The Council has the right to revoke this licence or amend it in accordance with the provisions of the Control of Pollution Act, 1974, Part I, and any subsequent legislation which may repeal this.

Contravention of Licence Conditions

Your attention is drawn to the provisions of Section 3, 9 and 16 of the subsequent Control of Pollution Act, 1974, or the relevant Sections of any subsequent legislation which may repeal this.

SECTION 3 -This section prohibits under penalty the deposit of waste, or the use of plant or equipment, otherwise than in accordance with the terms of a licence. This Section applies to all the conditions contained herein, including any which may be the subject of appeal to the Secretary of State under Section 10 of the Control of Pollution Act, 1974, Part I.

Any deposit which takes place without compliance with all the licence conditions may lead to prosecution under this Section. A person who contravenes Section 3 may be guilty of an offence and liable on summary conviction to a fine not exceeding £2,000 or on conviction on indictment to imprisonment for a term not exceeding 2 years or a fine or both.

SECTION 9- Non compliance with any licence condition may lead to the revocation of this licence.

SECTION 16 - The Regulation Authority may require the removal of any waste deposited when any of the conditions contained in this licence are breached.

A. DEFINITIONS

The following meanings shall apply throughout this licence:-

- A.1 THE SITE - shall relate to the area of land marked in blue on the 1:2500 location plan. No deposit, treatment or storage of waste/scrap shall take place outside the area marked in red on the aforementioned plan.
- A.2 THE OPERATIONAL AREA - shall relate to the area of land marked in red on the 1:2500 location plan.
- A.3 WORKING PLAN - shall refer to a series of drawings, plans and statements, which together will make up the 'Working Plan'.
- A.4 WASTE REGULATION AUTHORITY (WRA) - shall have the meaning assigned to it in Section 30(1) of the Environmental Protection Act, 1990, and in the case of this licence is Montgomeryshire District Council or its successor in title.
- A.5 DULY AUTHORISED OFFICER - shall mean any person authorised in writing by the Waste Regulation Authority pursuant to Section 91(1) and 9(2) of the Control of Pollution Act, 1974 and Sections 69 and 70 of the Environmental Protection Act, 1990.
- A.6 LICENCE HOLDER - shall mean the person or persons to whom this licence is granted or any person or company (accepted by the Waste Regulation Authority) to whom the licence is transferred in accordance with Section 8 of the Control of Pollution Act, 1974, and any subsequent legislation which may repeal this.
- A.7 OPERATING - shall mean the deposit of waste or acceptance of waste/scrap for depositing and all matters incidental thereto.
- A.8 INFRASTRUCTURE - shall mean the buildings, fencing, roads, static plant and engineering works that form the framework of the waste/scrap facility.
- A.9 ADEQUATE LIGHTING - shall be defined as a lighting level not less than 100 Lux, at 1 metre above ground level. Local lighting may be appropriate.
- A.10 SITE DIARY - means a daily record of all site operations as specified in the licence conditions. It is recommended that the format of this diary be agreed by the licensing authority.
- A.11 DRUM CONTAINER - shall mean any container in which material is stored. Such containers having storage capacities less than 10 litres or alternatively equal or greater than 1500 litres shall not be regarded as drum containers for the purpose of this licence.

- A.12 ENVIRONMENTAL HAZARD - shall have the meaning contained in Section 4(5) of the Control of Pollution Act, 1974 and any subsequent legislation which may repeal this.
- A.13 THE ACT - shall mean the Control of Pollution Act, 1974, as amended and any subsequent legislation which may repeal this.
- A.14 WASTE - shall have the same meaning as Section 30(1) of the Control of Pollution Act, 1974, and any subsequent legislation which may repeal this.
- N.B. This definition of waste includes scrap metal and scrap materials and the word 'waste' as used in this licence shall be so interpreted.**
- A.15 INDUSTRIAL WASTE - shall have the same meaning as Section 30(3)(b) of the Control of Pollution Act, 1974, and Schedule 3 of The Collection and Disposal of Waste Regulations, 1988 and any subsequent legislation which may repeal this.
- A.16 CLINICAL WASTE - shall have the same meaning as Regulation 2(1) of The Collection and Disposal of Waste Regulations, 1988, and any subsequent legislation which may repeal this.
- A.17 SPECIAL WASTE - shall refer to waste that is subject to Section 17 of the Control of Pollution Act, 1974 and Regulations made thereunder and any subsequent legislation which may repeal this.
- A.18 EMERGENCY - shall refer to any situation where a person has reasonable cause to believe that circumstances exist which are likely to endanger life or health or cause damage to property or pollution of water, air or land.
- A.19 FLAMMABLE - shall refer to a substance capable of supporting combustion in air.
- A.20 TANK - shall refer to a storage tank for fuel, oil or chemicals which has a volume equal to or greater than 1500 litres.
- A.21 TYRE - shall refer both to types which have been removed from the rim of a wheel and to those still attached to a wheel rim.
- A.22 CESSATION OF OPERATIONS - shall refer to any temporary or permanent closure of the operational area of the site.
- N.B. Reference in this licence to the masculine gender includes the feminine gender, companies and partnerships.**
- A.23 NON-FERROUS METALS - shall refer to aluminium, titanium, chromium, manganese, mercury, nickel, copper, zinc, molybdenum, silver, tin, tungsten, platinum, gold, lead and alloys of these metals.

- A.24 BURNING - shall not include the cutting of metals by Oxy-Propane torches or similar devices.
- A.25 HOURS OF DARKNESS - shall be defined by the statutory lighting up times published by the Science and Engineering Research Council.

B. GENERAL CONDITIONS

- B.1 SITE NAME: Goetre Villa,
Abermule,
Powys.
- GRID REFERENCE: SO 921 174
- B.2 LICENCE HOLDER: Lovatt Brothers (Partnership)
- B.3 OPERATOR: Lovatt Brothers (Partnership)
T Vaughan
- B.4 ADDRESS OF OPERATOR/LICENCE HOLDER: Lovatt Brothers,
Goetre Villa
Abermule,
Powys.

C. THE WORKING PLAN

- C.1 The following plans, drawings and statements, together with any later drawings or written statements received by the Waste Regulation Authority in substitute for, or in augmentation of such drawings and statements will hereafter be referred to as 'The Working Plan':-
- i) The 1:500 plan entitled 'Site Location and Operational Plan for Licence Application: Scrap Material Processing and Storage' (Ref: LA/001.B) dated May 1993 and the Site Location Plan , 1:2500 (Ref: LA/002.A) dated May 1993.
 - ii) Answers to question No's 1-29 inclusive of the Operational Statement contained within the Application Form for a Licence for Scrap Material Processing and Storage, dated 3/3/93.
- C.2 The Licence Holder (or his agent) shall notify the Waste Regulation Authority of any proposed changes to 'The Working Plan', as altered by any previously notified changes, at least one month before the applicant wishes the proposed change to be implemented. Proposed changes to the Working Plan must be submitted in writing (accompanied by drawings and plans where appropriate) signed by the licence holder (or his agent), and shall be titled as being an amendment to the Working Plan. The amendment must bear the date on which it is submitted for the agreement of the Waste Regulation Authority and the date on which the licence holder proposes to implement it. The proposed change shall not be implemented without the written agreement of the Waste Regulation Authority.
- C.3 The Licence Holder shall operate the facility in accordance with the Working Plan as agreed by the Waste Regulation Authority and attached to this licence. The Licence Holder shall obtain agreement from the Waste Regulation Authority for any proposed change in the actual conduct of the operations from the proposals agreed in the Working Plan, (as altered by any previously agreed changes) before the proposed change is implemented.
- C.4 The Working Plan shall form part of this licence.
- C.5 Within 3 months of the issue of this licence a revision of the Working Plan shall be submitted (Drawing LA/001.B) to designate:-
- i) area for temporary storage of unauthorised waste
 - ii) area designated for storage of
 - a) metal swarf
 - b) engine blocks and other oil contaminated components

- c) batteries or battery containers
- iii) areas where impermeable surfaces are to be constructed
- iv) areas where fuels are removed from vehicles and machinery
- v) area for storage of gas cylinders

The drawing shall be accepted as part of the Working Plan following the receipt of the agreement of the WRA in writing.

D. TYPES OF WASTE

- D.1 The types and maximum quantities of waste stored within the operational area at the site shall be restricted to the following:-

<u>Type of Material</u>	<u>Maximum Quantity Stored</u>
Scrap Vehicles inclusive of engines, batteries and tyres	300
Whole lead/acid batteries	10 tonnes
Electrical equipment	50 tonnes
Vehicle Engines	10 tonnes - excluding those which are an integral part of stored, whole, dismantled or part-dismantled vehicles.
Tyres	50 tyres - excluding those which are an integral part of stored whole, dismantled or part-dismantled vehicles.
Electrical Cable	50 tonnes
Ferrous Swarf	1 tonne
Ferrous metals, excluding those in the items listed above	200 tonnes
Non-Ferrous Swarf	5 tonnes
Non-Ferrous Metals, excluding those in the items listed above	20 tonnes
Construction/Demolition waste	40 tonnes

- D.2 The maximum quantity of waste accepted at the site (tonnes/year) shall be as agreed between the Licence Holder and the WRA.

- D.3 Wastes in the following categories shall only be accepted at the facility if arising from vehicles, plant or machinery received for the sole purpose of being processed at the facility:-
- i) Fuel oils
 - ii) Oil/water mixtures
 - iii) Mineral Oils
 - iv) Petrol
- D.4 No special waste shall be accepted at the site except battery acid, petrol, brake and hydraulic fluids arising from scrap vehicles accepted at the site.
- D.5 No clinical waste shall be accepted at the site.
- D.6 No liquid waste or sludge or articles containing liquids or sludges, shall be accepted at the site except for those liquids or sludges which form part of the integral workings of vehicles or machinery accepted as scrap at the site.
- D.7 No waste in drum or tank containers shall be accepted at the site, except that arising from scrap vehicles accepted at the site.
- D.8 No water soluble waste shall be accepted at the site.
- D.9 No substances which fall within the Control of the Radioactive Substances Act, 1960 and any subsequent amendments shall be accepted at the site.
- D.10 No percussives, explosives or any other substance with similar characteristics shall be accepted at the site.
- D.11 No waste containing flammable solvents, except petrol and diesel shall be accepted at the site.
- D.12 No waste containing elemental sodium, potassium or magnesium shall be accepted at the site.
- D.13 No waste containing polychlorinated biphenyl, Ugilec 141 or polychlorinated terphenyl shall be accepted at the site.
- D.14 All waste transformers and capacitors weighing more than 0.5 kilogramme each shall be assumed to contain polychlorinated biphenyl, Ugilec 141 or polychlorinated terphenyl, unless there is written evidence to the contrary and such evidence is made available to the Waste Regulation Authority.

- D.15 No waste containing any material which is in a fine powdered form (less than 1000 microns diameter) shall be accepted at the site.
- D.16 All wastes arriving on site shall be visually inspected to ensure that they conform with the requirements of Condition D.1 of this licence. Wastes which do not conform with the said condition shall be rejected as being unsuitable for acceptance at the site. The carrier of the waste should be instructed to take the waste to an appropriately licensed facility for disposal or treatment. An entry stating the type and quantity of the waste rejected, the name of the carrier and their controlled waste carrier registration number, and the date and time the load was rejected shall be entered into the site diary (Condition J).
- D.17 If after the acceptance of waste at the site there are reasonable grounds for believing or suspecting that waste other than that specified in D.1 has been delivered to the site, measures shall be taken immediately to place the said waste in an area designated for unauthorised wastes. The site operator shall, in agreement with the Waste Regulation Authority, designate an area for this purpose within 1 month of the issuing of this licence. The unauthorised waste shall either:-
- a) If the person responsible for delivering the load to the site can be traced, be returned to them, and they should be instructed to take the waste to an appropriately licensed waste facility for disposal or treatment. An entry stating the type and quantity of unauthorised waste involved, the date and time of discovery on site, and the date, time and to whom the waste was returned shall be made in the site diary (Condition J).
 - b) If no person can be definitely identified as being responsible for delivering the unauthorised waste to the site, be disposed of by the operator at an appropriately licensed waste facility within 14 days of the waste being discovered on the site. An entry stating type and quantity of unauthorised waste involved, date and time of discovery on site and date, time and name of point of final disposal shall be made in the site diary (Condition J).

If the unauthorised waste is either special waste or clinical waste the Waste Regulation Authority shall be notified as soon as practicable and in any case not later than 10.00am on the first working day following the discovery of the waste on the site. Arrangements must be made immediately by the operator for the waste to be removed within 7 days of its discovery on site to an appropriately licensed waste facility in accordance with all relevant regulations.

- D.18 The area designated for temporary storage of unauthorised wastes shall have an impermeable surface with provision of a leak-proof covered skip or other suitably sized covered container.

E. HOURS OF OPERATION

- E.1 Site operations shall not be permitted during the hours of darkness unless adequate lighting is provided, maintained and used to cover all operational areas of the facility. Site operations are prohibited under any circumstances before 0600 hours and after 2200 hours. Vehicles may enter and leave the operational area during the hours of darkness.
- E.2 No loading, unloading, treatment or processing of any material may be conducted within the operational area during the hours of darkness except in cases of emergency. All circumstances of an emergency shall be notified to the Waste Regulation Authority as soon as practicable or in any case not later than 10.00am on the first working day following the emergency.

F. OPERATIONAL PREPARATION

- F.1 Any waste already stored within the operational area which is not a waste permitted under Condition D.1 of this licence shall be removed from the site and disposed of at an appropriately licensed waste disposal facility within one month of the granting of this licence.
- F.2 Any waste already deposited outside the boundary of the operational area of the site, outlined in red on the Site Location Plan (Ref: LA/002.A) shall be within one month of the issue of this licence be either:-
- i) moved to a suitable location within the operational area of the site or
 - ii) disposed of at an appropriately licensed facility.

G. SITE INFRASTRUCTURE

G.1 Site Office

The site office located as indicated in the Working Plan (Drawing Ref: LA/001.B) will provide for the following:-

- a) Adequate heating and lighting.
- b) A telephone maintained in working order.
- c) Adequate first aid equipment.
- d) Welfare facilities for staff.

G.2 Weighbridge

The weighbridge at the site shall be maintained in working order and used to measure the weight of incoming scrap and all materials removed from the facility. The weighbridge shall be maintained at all times in a condition recalibrated 'passed fit for use for trade' in accordance with Section 11 of the Weights and Measures Act, 1985. The licence holder shall record in the site diary dates when the accuracy of the weighbridge is checked by an Inspector of Weights and Measures.

G.3 Notice Board

- i) A site identification board (minimum size 1.0 X 0.6 metres) of durable material and finish shall be erected within one month of the granting of this licence on the side of the weighbridge office (in a prominent position at the site entrance). This shall show (the minimum height of lower case letters to be 25mm):-
 - a) The name of the site.
 - b) The licence number of the site.
 - c) The name of the operator.
 - d) The times of operation of the site.
 - e) The name and telephone number of the Waste Regulation Authority responsible for issuing the licence.
 - f) The telephone number to be used in case of an emergency.
 - g) The words 'NO UNAUTHORISED TIPPING'.

- G.4 If the use of the site results in unauthorised deposits of waste, the Waste Regulation Authority shall be notified forthwith and a sign shall be erected to indicate that such deposits are illegal and an offence under the Act. Any such deposits shall be removed immediately on discovery to the area designated for unauthorised waste and dealt with in accordance with Condition D.16.

Site Security

- G.5 Within 3 months of the issue of this licence the whole perimeter of the operational area outlined in red on the 1:2500 site location plan (Ref LA/002.A) shall be secured in agreement with the WRA to effectively impede unauthorised access and prevent accidental access to the site.
- G.6 A suitable access gate shall be provided at the site entrance on a date to be agreed between the licence holder and WRA. The gate shall be kept locked in a closed position when the site is unattended.
- G.7 The lockable security gate indicated on drawing LA/001.B of the working plan shall be kept locked in a closed position when the site is unattended. A five lever padlock shall be used for this purpose.
- G.8 All fences and gates securing the operational area shall be inspected at intervals of not more than 7 days. Any damage which impairs their effectiveness found during the course of these inspections or at any other time shall be repaired within five working days. These inspections should be recorded in the site diary according to Condition J.4.

Site Access and Roads

- G.9 Adequate steps shall be taken to ensure that mud, waste or other materials are not tracked onto the public highway by vehicles using the operational area. If mud or any other debris is carried onto the highway by vehicles using the operational area, immediate steps shall be taken to cleanse the affected area. If such a problem continues to arise then suitable wheel cleaning facilities must be provided, maintained and used to prevent mud or other debris being carried onto the public highway.
- G.10 The existing section of roadway at the site entrance leading from the public highway shall be kept in good repair, any potholes which develop shall be filled and resurfaced flush with and to the same standard as the rest of the surrounding access road within five working days.
- G.11 Subsidiary site roads surfaced with hardcore shall be provided to allow access to working sections of the operational area.

H. SITE CONSTRUCTION

- H.1 The hard surfaces within the operational area shall be kept in good repair and any potholes which develop shall be filled and resurfaced flush with and to the same standard as the rest of the surrounding area within 5 working days.
- H.2 Any impermeable surfaces shall be cleaned as necessary or when requested by the WRA to prevent pollution of the environment and to ensure that no material is tracked onto the highway. Washings shall be treated as contaminated site drainage and either passed through a suitably sized oil/water interceptor to an approved sewer discharge or drained directly to a sealed sump prior to off-site disposal.
- H.3 Provision shall be made and maintained within the confines of the operational area for the parking, loading and unloading and manoeuvring of vehicles transporting wastes to and from the facility.
- H.4 Within 3 months of this licence being issued the site operator shall submit, in writing, to the Waste Regulation Authority a scheme for the separate storage of:-
 - i) engine blocks and other oil contaminated components
 - ii) batteries
 - iii) metal swarf
- H.5 Engine blocks and other contaminated components shall be stored either:-
 - i) within a bunded, impermeable area which is under cover; or
 - ii) within a bunded impermeable area which is not under cover but which is either drained via an oil/water interceptor to an approved sewer discharge or drained directly to a sealed sump prior to disposal off-site.
- H.6 Batteries shall be stored within a covered and bunded acid proof area.
- H.7 Metal swarf shall be stored within a bunded, impermeable area which is under cover and which is independent of any drainage system.
- H.8 The schemes prepared under Condition H.4 shall be submitted within the specified time period for the agreement of the WRA. Any modifications requested by the WRA and agreed to by the licence holder shall be incorporated into the proposed scheme within 3 months of the submission of the scheme.
- H.9 The schemes agreed under Condition H.8 shall be completed within 6 months of the agreement made under Condition H.8.

- H.10 There must be no discharge from the site of trade effluent, sewage effluent, contaminated liquid from oil/water interceptors or blind sumps or other contaminated site drainage into any ditch, watercourse, surface sewer or soakaway.
- H.11 Site drainage shall be constructed and maintained so that water does not accumulate at the facility. These shall include interception of contaminated surface water and spillages to prevent contamination of the drainage system and the disposal of foul sewage.
- H.12 All liquid storage tanks (waste oil, transformer oil, diesel fuel oil) must be sited at a minimum distance of ten metres from the watercourse.
- H.13 Within 12 months of this licence being granted any liquid storage tanks (waste oil, transformer oil, diesel fuel oil) must be either:
 - i) sited on an impermeable base and surrounded by an impermeable bund wall, capable of impounding not less than 110% of the volume of the largest tank, or
 - ii) sited over an appropriately located rupture tank of 110% of the volume of the storage tank.

All inlet, outlet, vent pipes and gauges must be located so that any leakage would be retained by either H.13-i) or H.13-ii). There must be no drainage through floor or walls in either i) or ii), but measures must be taken to ensure that the capacity of 110% of the storage tanks are maintained at all times, by removing liquid/water caught within the bund by means of bailer or pump.

- H.14 Any liquid accumulating in either the rupture tank or the bunded area shall be visually inspected and it if consists of;
 - i) wholly rainwater it may be pumped into the foul sewerage system ONLY if a consent is obtained from the relevant body prior to any discharge or
 - ii) if no consent is obtained or if the accumulated liquid is contaminated it shall be tankered away to an appropriately licensed waste facility.
- H.15 All tanks within the operational area shall be clearly labelled to identify their capacity and contents.
- H.16 All tanks, and impermeable barriers shall be inspected weekly for signs of wear and shall be repaired or replaced accordingly. A note shall be made in the site diary of the date of inspection, and any defects found and action taken (Condition J.4).
- H.17 All drums of liquid or sludge wastes, fuel, oil or other chemicals used or stored within the operational area of the site shall be stored on a base and surrounded by an impermeable bund wall, capable of impounding 110% of the volume of the drum(s). All such drums shall be labelled to identify their contents.

I. SITE OPERATION/HANDLING METHODS

- I.1 No deposit or delivery of waste shall take place unless the conditions of this licence have been made known to and understood by the person who is given responsibility for the management or control of the site. Within one month of this licence being granted the licence holder shall supply in writing to the Waste Regulation Authority the name and designation of the Site Supervisor and the name of the person who will deputise for the Site Supervisor in his/her absence from the site.
- I.2 Only waste delivered to the site by a Registered Carrier of Waste, as defined in Section 1(1) of the Control of Pollution (Amendment) Act, 1989, or a person who is exempt from the requirement to register by virtue of the Controlled Waste (Registration of Carriers and Seizure of Vehicles) Regulation, 1991, may be accepted at the site.
- I.3 Where applicable, all persons delivering waste to the site must comply with all aspects of the Duty of Care as defined in Section 34(1) of the Environmental Protection Act, 1990.
- I.4 The following documents shall be kept at the site office:-
 - i) The current waste disposal licence;
 - ii) Any amendments to the licence;
 - iii) The current operational plan;
 - iv) The emergency plan (Condition P);
 - v) The current notice to the Waste Regulation Authority giving details of the Site Supervisor and his/her deputy;
 - vi) A copy of record sheets required to be kept under Conditions J.1 and J.2;
 - vii) Site diary required under Condition J.4;
 - viii) Any Section 17 notices required by virtue of acceptance at or removal from the site of special wastes.
- I.5 Within three days of the receipt of any notice or instruction from any authority other than the Waste Regulation Authority, which in any way relates to the use of the operation area, a copy of that notice or instruction shall be given to the Waste Regulation Authority.
- I.6 The site shall be inspected daily by the person responsible for the management or control of the site (Condition I.1) to ensure that the limitations and conditions specified in this licence are being observed. A record of these inspections shall be made in the site diary and retained for inspection by officers of the Waste Regulation Authority (Condition J.4).

- I.7 Members of the public admitted to the operational area shall be supervised to ensure that their presence does not cause a contravention of any of the Conditions included in this licence.
- I.8 The site shall be manned at all times by at least one operative when it is open for the reception and removal of wastes. No waste shall be accepted, sorted or removed from the area marked in red on the 1:2500 location plan (Ref: LA/002.A) unless at least one operative is manning that area of the site. That area shall remain manned at all times whilst waste is being deposited, sorted or removed.
- I.9 No waste or container shall be stacked within the operational area to a height greater than 4 metres subject to the stack being in a stable condition. Within 1 month of the granting of this licence the height shall be clearly marked at all storage areas within the operational area.
- I.10 No storage or processing of waste materials shall take place within 10 metres of the bank of any open watercourse at or adjacent to the operational area.
- I.11 No storage or processing of waste materials shall take place within 2 metres of any culverted watercourse at or adjacent to the operational area.
- I.12 Fuels accepted at the site in association with scrap vehicles or machinery shall be drained from the vehicles or machinery at the location indicated on drawing No LA/001.B of the Working Plan. This area and any subsequent fuel storage areas shall be designated 'NO SMOKING AREAS' and appropriate signs shall be prominently displayed. Fuel removed from vehicles or machinery shall be stored in accordance with Conditions H.13 and H.17.
- I.13 All other liquids or sludges accepted at the site in association with scrap vehicles or machinery shall remain sealed within the vehicles or machinery, except in the case of an emergency.
- I.14 Tyres accepted at the site which are not an integral part of a scrap vehicle shall be stored in an area designated for storage of light**. The site operator shall, in agreement with the Waste Regulation Authority, designate an area for this purpose within 3 months of the granting of this licence.
- I.15 Metal swarf accepted at the site shall upon delivery, be stored in watertight containers and shall be covered by an impervious material to prevent water ingress into the containers. On implementation of the agreed scheme under Condition H.4, metal swarf shall be stored in accordance with Condition H.7.
- I.16 Batteries shall be removed from all vehicles and machinery which are to be scrapped as soon as practicable but must be removed within 3 days of delivery to the site.

- I.17 All batteries accepted at the site shall immediately be placed in a watertight acid-proof container and covered by an impervious material to prevent water ingress into the container. The container shall not be filled above a level of 150mm below the top of its sides. On implementation of the agreed scheme under Condition H.4, batteries shall be stored in accordance with Condition H.6.
- I.18 There shall be no draining of battery electrolyte or breaking of batteries at the site. Batteries shall be handled in such a manner that they are not damaged and their contents are not spilled or otherwise allowed to escape from their casing. They shall be stored in an upright position.
- I.19 Where any container, tank, vessel or vehicle is to be cut, crushed or opened it shall be done in such a way as to prevent spillage of any liquid contents or residue.
- I.20 If required by the Waste Regulation Authority, any waste or other material segregated for reuse or resale shall be removed forthwith, if, according to the Waste Regulation Authority, it is likely to give immediate rise to pollution of water, danger to public health.
- I.21 Any cessation of operations for a period in excess of one month shall be notified to the Waste Regulation Authority within 7 days of cessation. Not less than 14 days notice shall be given to the Waste Regulation Authority of the date on which operations are to recommence in the event of such a cessation.

J. SITE DIARY AND RECORDS

J.1 Daily records shall be kept of:

- i) the weight (tonnes) and type of waste received and removed from the operational area of the site,
- ii) the date and time when waste is delivered to and removed from the operational area of the site,
- iii) the name of the driver, company, vehicle registration number and waste carrier registration number (where applicable) of the driver delivering/removing the waste,
- iv) the place of origin of the waste including District of origin,
- v) the final disposal point/destination of waste removed from the operational area of the site including waste oil

J.2 A copy of records required under Condition J.1 shall be kept at the site office for inspection during working hours by an authorised officer of the WRA. A summary of the records shall be forwarded to the Waste Regulation Authority quarterly (namely at the end of March, June, September and December).

J.3 An accurate estimate of types and quantities of waste stored within the operational area of the site shall be submitted with the first set of records after the granting of this licence.

J.4 A site diary shall be kept of the following:

- i) severe weather conditions;
- ii) any incidence of fires or other emergency within the operational area of the site;
- iii) any incidence of fly-tipping at the site;
- iv) dates on which the site was inspected for:
 - a) litter
 - b) defects in any drainage system
 - c) defects in the fencing/security
 - d) compliance with the site licence conditions
 - e) any defects in the storage tanks within the operational area
 - f) signs of infestation

- v) any mechanical breakdowns of plant. A note shall be entered into the diary when the machine was again fully operational.
- vi) any incidents of unauthorised wastes being brought onto site;
- vii) dates on which water sampling in accordance with Condition M was carried out.

The results of J.4-vii) shall be entered into the diary not later than 5 working days after they have become available.

- J.5 The site diary shall be made available for inspection of any authorised officer of the Waste Regulation Authority during working hours.

K. PLANT

K.1 The plant to be utilised during the operation of the site shall be as specified in the Working Plan as agreed by the WRA or similar plant may be used.

K.2 In the event of a serious plant or vehicle breakdown which prevents the site from being operated in accordance with the conditions of this licence:-

- i) alternative equipment must be brought onto site or
- ii) if alternative equipment cannot be found within one working day no further waste shall be delivered to the site and waste shall be diverted to alternative licensed facilities.

K.3 Due care will be taken during refuelling and servicing operations to ensure that there is no leakage/seepage of fuel, hydraulic fluid or engine oil.

L. ENVIRONMENTAL CONTROLS

L.1 Dust Suppression

The site road and hard surface areas shall, as necessary in dry weather, be treated to prevent dust nuisance occurring.

L.2 Pest Control

- i) The operational area of the site shall be inspected weekly for any signs of infestation by vermin or insects.
- ii) Details of the inspections should be entered into the site diary (Condition J.4).

In the event of infestation occurring within the operational area of the site, all necessary works must be carried out to alleviate any such problem. All acceptance of waste at the site must cease until such time as it can be shown that there is no longer an infestation problem.

L.3 Odour Control

In the event of any unacceptable problem with mal-odour occurring within the operational area of the site, all necessary steps shall be taken to alleviate any such problem.

L.4 Litter Control

- i) Not less frequently than once a week any loose waste material which may be lying on the site shall be collected and disposed of in such a way as to keep the site tidy.
- ii) Any waste which is blown against the boundaries of the site or which is blown from the site shall be collected and dealt with as in Condition L.4(i).
- iii) Without prejudice to any of the foregoing conditions the escape of any controlled waste in the control of the licence holder shall be a breach of the Duty of Care, as respects waste, as defined under Section 34(1)(b) of the Environmental Protection Act, 1990.

L.5 Pollution Control

- i) Sufficient suitable absorbent material shall be kept in storage to adequately deal with any liquid or sludge spillages which may occur within the operational area of the site. This absorbent material shall be kept dry until required.

- ii) The collection and removal of any spillage of battery acid shall be undertaken by a registered waste disposal contractor and taken to an appropriately licensed waste disposal facility.
- iii) Any contaminated absorbent material used in accordance with Condition L.5(i) and L.5 (ii) shall be collected, removed from the site and disposed of immediately after use, to a suitably licensed waste disposal facility in accordance with all relevant legislation.
- iv) Spillages of liquids or sludges shall be dealt with immediately.

M. WATER SAMPLING

- M.1 All watercourses and ditches at or adjacent to the site shall be inspected at intervals of not more than 7 days for any visual signs of oil or petrol contamination. A record of these inspections shall be kept in the site diary (Condition J). If any oil or petrol contamination of any watercourse or ditch is found the operator must inform the Waste Regulation Authority as soon as practicable or in any case not later than 10.00am on the first working day following the incident.
- M.2 A sampling point shall be constructed at a location to be agreed with the WRA to facilitate representative sampling of all site drainage prior to its discharge into the highway drain near to the site entrance. A representative sample shall be taken and analysed quarterly (i.e. during January, April, July and October) for the following determinants:-

Suspended solids (mg/l)
Metals (ug/l)
 Copper
 Chromium
 Lead
 Nickel
 Zinc
 Silver
pH
Quantitative Oil
Total Iron (mg/l)

Samples are to be submitted for analysis to a public analyst. The licence holder should obtain advice from the analyst as to the type of container to be used and quantity of sample required.

- M.3 Additional water samples may be required by the WRA or NRA. Should additional samples be required the licence holder shall be informed as to where the samples are to be taken and which parameters are to be measured.
- M.4 For both the regular and additional monitoring required by Conditions M.2 and M.3 of this licence:-
- a) The cost of monitoring and analysis shall be borne by the licence holder.
 - b) Copies of the Analyst's report shall be sent to the WRA and NRA, not later than three days after receipt of the reports.
 - c) The dates on which water samples were taken should be recorded in the site diary (Condition J.4).

N. FIRE AND FIRE PRECAUTIONS

- N.1 No waste material shall be burnt within the boundaries of the operational area of the site and a fire within this area shall be regarded as an emergency and immediate action shall be taken to extinguish it.
- N.2 Emergency provisions shall be made to allow discharge of loads found to be on fire or in an otherwise dangerous condition, details of these provisions to be included in the emergency plan (Condition P).
- N.3 All outbreaks of fire shall be notified to the Waste Regulation Authority forthwith.
- N.4 At least two suitable portable fire extinguishers shall be kept at the site for use in an emergency. These extinguishers shall be maintained in accordance with the manufacturers specifications.
- N.5 Adequate access to all areas at the site shall be maintained at all times to permit access for Fire Brigade Vehicles.
- N.6 Gas cylinders shall be secured in an upright position in a ventilated place when not in use. The gas cylinders shall be maintained and used in accordance with the manufacturers/suppliers specifications and safety instructions.
- N.7 Gas cutting equipment will be used in accordance with manufacturers/suppliers specifications and safety instructions.
- N.8 Conditions N.1 and N.3 are not applicable in the case of operations which are authorised by the Air Pollution Control Authority under the Environmental Protection (Prescribed Processes and Substances) Regulations, 1991.

P. EMERGENCY PLAN

P.1 An emergency plan shall be provided (within three months of this licence being granted) detailing the procedures to be adopted should:-

- i) a fire break out within the operational area of the site;
- ii) any spillage of fuel or hazardous liquid brought into the operational area of the site occur;
- iii) any clinical, hazardous or special waste not permitted by this licence be brought onto the site;
- iv) any contamination of the adjacent watercourse resulting from the activities of the site;
- v) any other such emergencies occur.

The local Environmental Health Department, the Health and Safety Executive, National Rivers Authority and the Emergency Services should be consulted when drawing up these procedures.

P.2 The Emergency Plan detailed above shall be submitted, within the specified time period, for the approval of the Waste Regulation Authority. Any modifications requested by the Waste Regulation Authority and agreed to by the licence holder shall be incorporated into the plan within two months of such agreement.

P.3 Details of the emergency plan shall be available at the site office together with the location and content of fuel stores.

P.4 Operational staff shall be made aware of and shall be fully conversant with the content of the emergency plan.
