Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

This variation permits an increase in annual throughput to 100,000 tonnes and increases the permitted boundary to encompass an adjacent area for the expansion of the waste facility. Additional recovery operations include repair and refurbishment of WEEE.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Status log of the permit
