Section 1 – Compliance Assessment Summary

This is based on the requirements of the permit under the Environmental Permitting Regulations or the licence under the Water Resources Act 1991 as amended by the Water Act 2003. A detailed explanation is captured in "Compliance Assessment Report Detail" (Section 2) and any actions you may need to take are given in the "Action(s)" (section 4). This summary details where we believe any non-compliance with the permit has occurred, the relevant condition and how the non-compliance has been categorised using our Compliance Classification Scheme (CCS). CCS Scores can be consolidated or suspended where appropriate, to reflect the impact of some non-compliances more accurately. For more details of our CCS scheme, contact your local office.

Permit conditions and compliance summary	CCS Category	Condition(s) breached
A1 - Specified by permit	A	
B3 - Infrastructure - Site drainage engineering (clean and foul)	A

- Any non-compliances identified
- Any non-compliances with directly applicable legislation
- Details of any multiple non-compliances
- Information on the compliance score accrued inc.
- Details of advice given
- Any other areas of concern
- Any actions requested
- Any examples of good practice
- A reference to photos taken

This was a routine unannounced site inspection by Natural Resources Wales (NRW) officer Alastair Wilson (Environment Officer).

Throughout the inspection weather conditions were fine, mild and sunny.

The site was operational and appeared busy with members of the public arriving depositing waste.

Upon arrival the inspecting officer introduced himself to an operative at the site. The operative accompanied officers at times throughout the inspection but also left the officer for short periods whilst assisting members of the public arriving at the site.

The officer undertook a thorough walk around of the permitted area. As the site was operational and busy, the officer was able to gain a good understanding of how operations take place at the site.

The officer was able to observe members of the public placing items of waste within the designated areas and asking the operative for advice and assistance. Overall the level of segregation appeared to be of a high standard, with misplaced items being moved to the correct location by the operative.

Waste operations at the site all appear to comply with the permit conditions.

Site drainage was in good order, and the site inspection records show that it is inspected daily.

The operative had a good knowledge of the site operating procedures and was able to provide the site environment permit, site environment management system and inspection records when requested. The operative had a good knowledge of what materials were accepted by the site, and those which are not.

Waste was kept within designated skips, drums and tanks as specified by the permit. A new bunded waste oil tank is now at the site, and the old tank has been locked shut and is awaiting removal.

The site appeared to be secure with a barbed wire topped security fence around the perimeter and lockable gates.

There were no issues with odour or dust. The road into the site is sealed pavement, as are all accessible areas within the site therefore there were no deposits on the road. Litter was well managed with the operative clearing up litter when it was observed, and actively checking for litter regularly. There were no issues with regards to pests/birds or scavengers.

Good records were kept on the site, in the site diary and on a bespoke inspection record sheet.

Thank you for your time. Should you have any questions or queries please do not hesitate to contact me, Alastair Wilson (0300 065 3660 or Alastair.wilson@cyfoethnaturiolcymru.gov.uk).

Section 3 – Enforcement Response

You must take immediate action to rectify any non-compliance and prevent repetition.
Non-compliance with your permit conditions constitutes an offence and can result in criminal prosecutions and/or suspension or revocation of a permit. Please read the detailed assessment in Section 2 and the steps you need to take in Section 4 below.

Section 4 – Action(s)

This section summarises the actions identified during the assessment along with the timescales for when they will need to be completed.

Criteria Ref.	CCS Category	Action required/advised	Due Date
See Section 1 above			

Section 5 – Compliance notes for the Operator

To ensure you correct actual or potential non-compliance we may

- Advise on corrective actions verbally or in writing
- Require you to take specific actions verbally or in writing
- Issue a notice
- Require you to review your procedures or management system
- Change some of the conditions of your permit
- Decide to undertake a full review of your permit

Any breach of a permit condition is an offence and we may take legal action against you

- We will normally provide advice and guidance to assist you to come back into compliance either after an offence is committed or where we consider that an offence is likely to be committed. This is without prejudice to any other enforcement response that we consider may be required.
- Enforcement action can include the issue of a formal caution, prosecution, the service of a notice and/or suspension or revocation of the permit.

See our Enforcement and Civil Sanctions guidance for further information

This report does not relieve the site operator of the responsibility to

- Ensure you comply with the conditions of the permit at all times and prevent pollution of the environment
- Ensure you comply with other legislative provisions which may apply
