Dear Mr Bradley

Returning your site to compliance with your environmental permit

We recently identified non-compliances with your environmental permit. Failure to comply with a permit condition is an offence and it is important that you resolve these problems as soon as possible. During recent discussions you proposed to take steps to return your activity to compliance that we consider reasonable.

We record all breaches of permit conditions on our Compliance Classification Scheme (CCS) database. These records contribute to an annual compliance rating that affects your annual subsistence charge.

While you carry out these steps we will continue to record your site as non-compliant on our CCS database. However, we are prepared to 'suspend' these ongoing permit breaches so that they do not count toward your annual compliance rating.

Please complete and return the attached Action Plan specifying your proposed actions with appropriate completion dates. Your proposals should be clearly set out and achievable.

Once we agree with your proposals and timescales for action then we will suspend non-compliances from that point forward for a period no longer than the dates specified in the action plan overleaf. However, we reserve the right to cancel the suspension and count all permit non-compliances toward your compliance rating should you fail to follow the actions specified or should you cause pollution to the environment.

If you have any queries or concerns please contact me on 03000 653498.

Yours sincerely

Neil Griffiths
Environment Officer – Usk & Wye Industry & Waste Regulation
