### Introductory note

**This introductory note does not form a part of the notice.**

The following notice gives notice of the variation and consolidation of an environmental permit.

This permit has been varied and consolidated as part of a variation application made by the operator. The variation permits the inclusion of a non-hazardous waste code, an increase in the yearly throughput to 25,000 tonnes and an increase to the site boundary. The extended area is hardstanding and is suitable therefore only for uncontaminated ferrous or alloys and non-ferrous metals, untreated wood and inert waste only.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
