### Introductory note

**This introductory note does not form a part of the notice.**

The following notice gives notice of the variation and consolidation of an environmental permit.

This variation is to introduce a trial of the use of Used Cooking Oil (UCO) in the diesel Hydrotreater (HTU1) on site. The UCO will displace the raw mineral diesel base feed and turn a used product into a renewable fuel. By reducing the raw minerals in the HTU1 feed, this will reduce the overall energy required in the crude unit and will produce a site wide benefit. The trial is proposed to run for between 2 week and 2 months in the months between August and December.

The schedules specify the changes made to the permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.
