Cc: Stephen Barnes: Stephen@crestwoodenvironmental.co.uk

Application number: PAN-002004

Natural Resources Wales, in exercise of its powers under paragraph 4 of Part 1 of Schedule 5 of the above Regulations, requires you to provide the information detailed in the attached schedule. The information is required in order to determine your application for a permit, dated **15/01/18**.

The information requested should be sent to the following address by **21st March 2018**.

Information should be sent to:

Permitting Service (Cardiff)
Natural Resources Wales
Cambria House
29 Newport Road
Cardiff
CF24 0TP
Email: ella.williams@naturalresourceswales.gov.uk

Authorised on behalf of Natural Resources Wales

Schedule

1. Fugitive emissions to water

In the H1 Accident and Amenity Risk Assessment provided (Crestwood Report Reference: CE-TM-0937-RP06-Final), it states:

The Site's Planning Permission requires that materials cannot be deposited within 7m of the reens to provide an effective barrier between inert waste deposit and surface watercourse. The surrounding reens will be inspected on a regular basis so that in the event of a visible increase in suspended solid levels this can be investigated in accordance with the EMS and mitigation action taken, as required.

- a) There is no supporting information in the Environment Management System (EMS) provided. As this is a Site of Special Scientific Interest (SSSI) we require this information to determine the risk.

Action: Please provide the parts of the EMS that detail the normal and abnormal operating conditions in which monitoring of suspended solids will take place; with detail of what this monitoring will entail, and what the remedial action referred to involves.

- b) The risk assessment refers to 7m buffers as mitigation for fugitive emissions to water. The cross sections drawing (Drawing number: DW05 Figure 2) in the approved waste recovery plan state a minimum of 10m buffer, and the outline landraise plan (drawing no: CE-TM-0937-DW05-FINAL) appear to have larger buffers than 10m this using the scales provided.

Action: Please clarify the minimum buffer distances, on all four sides of the permitted boundary, at the closest point between the infill area and the reens/field ditches/drainage ditches. Please clarify this in:

- an amended risk assessment as appropriate.
- on a drawing
